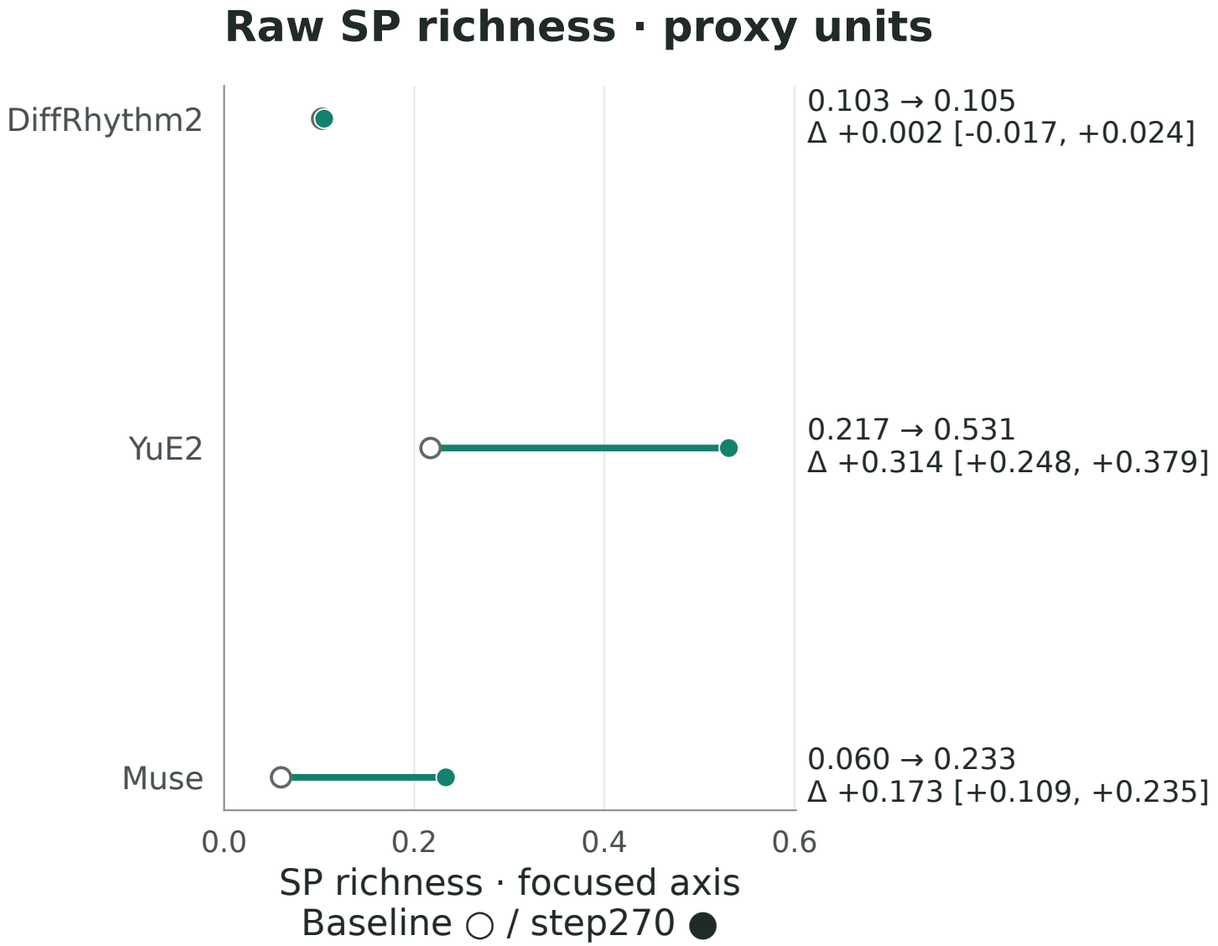
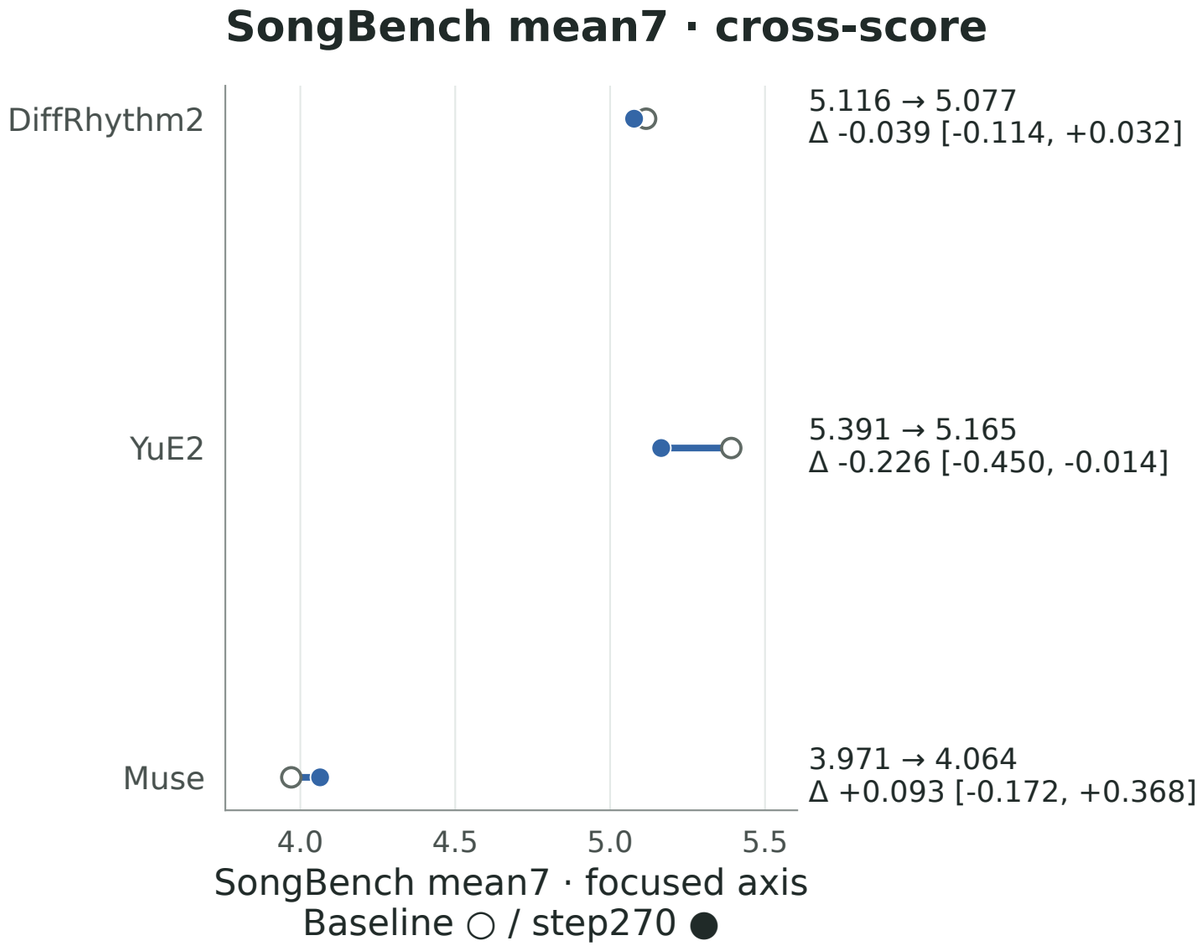
# Does SP richness transfer to learned music scores?

C

Same three SP-trained arms · raw SP and SongBench use different units





N=30 paired conditions · 95% condition-bootstrap CI · 10,000 resamples · one training seed

Different model budgets / adapters / beta: within-arm effects only, not a causal comparison of model quality.

Validation, not full-song test or human preference. Unadjusted intervals; no across-model causal ranking.
